We hereby submit specifications and estimates for:
Tennis court repair and color.

Premier Repair and Installation to Court #2

- Clean tennis court surface to remove any loose dirt and debris. Powerwashers and blowers may be used.
- Fill cracks with cementitious acrylic crack patch mix. Cementitious acrylic patch mix is a high strength bonding liquid designed for field mixing with Portland Cement and silica sand. The resulting patch is hard, tough and durable.
- Screed cementitious acrylic patch mix into low areas to reduce the amount of standing water.
NOTE: Due to the 1% fall inherent with tennis courts, amount of improvement can not be guaranteed.
- Repair rippled edge of existing Premier surface.
- Install Premier court surface to ONE tennis court.
- Apply two applications of acrylic resurfacer to the entire surface to create "ZERO TEXTURE". This will fill voids and help blend in patched areas.
- Apply two applications of acrylic color filler coat (w/ sand) and one application of acrylic color finish coat (w/o sand). Materials are field mixed for quality control.
NOTE: The above will create a smooth yet texturized surface for medium play. Colors to match existing.
- Layout one tennis court per USTA standards for doubles play. Lines will be hand striped with white line paint.

Premier Repair and Installation.....\$37,950.00

We agree to furnish all labor materials, complete, according to the above specifications. Payment will be **Net 10 Days** on completion of the work.

manner, and in accordance with standard practices recommended by the manufacturer. Any alteration or deviation from the above specifications involving extra cost will be executed only upon written orders, and will become an extra charge over and above the amount stated herein.
